

ADJUSTING TIRE ORDER POINTS OR RETAIL PRICE

Never Use The Inventory List Function Of Mitchell For Adjusting **TIRE** Order Points, Retail Price Or Description Changes. Even Just Looking At The Items And Clicking The OK Button Will Render Your Tire Lookup By Size Useless.

The screenshot shows two overlapping windows from the Mitchell software. The top window is titled 'Inventory List' and contains search criteria for Vendor, Category (set to '< All >'), and Manufacturer (set to 'GOODYEAR (GOO)'). The bottom window is titled 'Edit Part' and displays details for Part No. 100-394-200, Description 'ZGY P195/60R14 Eagle GT-HR 85 H SL VSB 50K', and Manufacturer 'GOODYEAR (GOO)'. It includes fields for Category (Tires), Account (Tires (Taxable Income)), Location, and Attached items (0). There are also checkboxes for 'Tire', 'Taxable', 'No Commission', 'User Entered Price \$', 'Excise Tax 1', and 'Excise Tax 2'. A summary table on the right shows pricing: Last Paid \$60.93, Last Sold New, Average Cost \$63.39, Total Cost \$0.00, Total Price \$0.00, On Hand 0.00, On Order 0.00, Committed 0.00, Last Cost \$ 63.39, Price \$ 79.99, and List \$ 0.00. At the bottom are buttons for 'Alt Sale', 'Alt Parts', 'Sales', 'Core', 'Fee', 'Vendor', 'Supersede', 'Cancel', and 'Ok'. A large yellow 'X' is drawn over the entire screenshot.

Instead Use Custom Reports MIN/MAX ADJUSTER Utility Found At The Top Of Your Main Menu. You May Update Any Of The Highlighted Items Below. You May Also Update Your Tire Size If Needed. Be Sure The Tire Size is Just Numbers. See The Example On the Next Page.
